

NEETI MALU

Data Scientist | Machine Learning Engineer | AI Enthusiast

Pune, India | +91-7821987968 | neetimalu@gmail.com | linkedin.com/in/neeti-malu |
github.com/neeti26 | Portfolio

OBJECTIVE

Analytical Data Scientist with hands-on experience in Python, SQL, and Scikit-learn. Skilled in data wrangling, exploratory data analysis (EDA), and building high-performing predictive models. Proficient in data visualization with Power BI and Matplotlib. Passionate about solving real-world problems through data-driven insights and continuous learning.

EXPERIENCE

CYNKEX — Cyber Intern

Jan 2026 – Present | Remote

- Automating GRC (Governance, Risk & Compliance) workflows to reduce manual audit effort and improve policy enforcement consistency across security operations.
- Building risk management systems that surface real-time threat indicators and map them to compliance frameworks (NIST, ISO 27001).
- Designing dashboards to track risk posture across infrastructure assets, enabling proactive threat response.

Infosys Springboard — Artificial Intelligence Intern

Oct 2025 – Dec 2025 | Remote

- Developed a Smart Traffic Management System using YOLOv8 and TensorFlow for real-time Automatic Number Plate Recognition (ANPR) and vehicle classification.
- Integrated OpenCV pipelines for high-accuracy vehicle tracking and license plate recognition across live video feeds.
- Built interactive dashboards for city-scale traffic density visualization, improving operational decision-making.

NIT Trichy — Data Analyst Intern

Mar 2025 – Aug 2025 | Remote

- Built ML classification models using Scikit-learn to detect fraudulent vehicle insurance claims, boosting detection accuracy by 30% through feature engineering and SMOTE oversampling.
- Enhanced model robustness via hyperparameter tuning (GridSearchCV) and stratified cross-validation.
- Delivered weekly data reports and visual dashboards to stakeholders, enabling data-driven decision-making.

AdTech Digital — Data Science Intern

Dec 2024 – Jun 2025

- Analyzed campaign performance data and optimized Power BI dashboards, improving insight delivery speed and usability for marketing teams.
- Identified a 15% drop in user retention through cohort analysis, providing actionable insights that redirected marketing strategies for better ROI.
- Automated Excel-based reporting workflows using Python, reducing manual effort by 40%.
- Conducted A/B testing to guide budget allocation across digital marketing channels.

PROJECTS

Vehicle Insurance Fraud Detection – POC

Python, Scikit-learn, Matplotlib, Seaborn

- Built a machine learning system to detect fraudulent vehicle insurance claims using Random Forest, Decision Tree, and Naive Bayes classifiers.

- Improved model performance through feature engineering, preprocessing, and SMOTE, achieving an F1-score of 0.94.
- Visualized key fraud indicators with Matplotlib and Seaborn; reduced false positives by 30%.

VAE-Powered Synthetic Data Generator

Python, TensorFlow, Scikit-learn | github.com/neeti26/VAE-Powered-Synthetic-Data-Generator

- Developed a Variational Autoencoder (VAE) to generate synthetic network traffic data, addressing class imbalance in intrusion detection datasets.
- Improved detection accuracy of network anomalies by 25% by augmenting training data with realistic synthetic samples.
- Conducted comprehensive EDA and visualized attack patterns to enhance interpretability for cybersecurity stakeholders.

PersonaSynth – Chat With Your AI Personality Twin

Python, PyTorch, Offline LLM, NLP, Speech Synthesis | github.com/neeti26/PersonaSynth

- Built a fully offline, privacy-friendly AI system that emulates a user's personality and communicates in their own voice.
- Integrated NLP and speech synthesis to generate personalized conversational responses; achieved 95% accuracy in personality alignment tests.

Customer Emotion to Offer Mapper

Python, NLP, Scikit-learn, Pandas | github.com/neeti26/emotion_offer_mapper_project

- Designed a predictive model mapping customer emotions from text to optimal product/service offers using sentiment analysis.
- Increased targeted offer relevance by 20% through feature engineering and multi-class emotion classification.
- Automated dashboards and reports for marketing teams, enabling data-driven campaign adjustments.

Automated GRC Engine

Python, REST API, ML, Automation

- Built an intelligent automation engine that maps security controls to compliance frameworks and generates audit-ready reports.
- Designed ML-driven workflows to flag policy violations in real time, eliminating repetitive compliance tasks.

Live Polls and Quizzes DAO (Aptos)

Blockchain, Move Language, Aptos | github.com/neeti26/Test

- Designed and deployed a decentralized application (DAO) for live polls and quizzes on the Aptos blockchain.
- Implemented smart contracts in Move to ensure secure, transparent, and tamper-proof poll management.

SKILLS

Programming & Tools: Python, SQL, Java, JavaScript, C, Jupyter Notebook, Google Colab, Git, AWS, Excel

ML & AI Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn, SciPy, YOLOv8, OpenCV

Databases & Visualization: MySQL, MongoDB, Power BI, Excel Dashboards

Mathematics & Analysis: Probability, Statistics, Linear Algebra, Calculus, A/B Testing, Hypothesis Testing, EDA

Soft Skills: Problem-Solving, Critical Thinking, Communication, Teamwork, Adaptability, Data Storytelling

EDUCATION

Bharati Vidyapeeth Deemed University, Pune

Mar 2023 – May 2026

Bachelor of Computer Application | GPA: 9.4 / 10.0

Relevant Coursework: Database Management, Data Structures, Machine Learning, Business Analytics

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional – Oracle (Oct 2025)
- Amazon Web Services Technical Essentials – AWS (Oct 2025)
- AWS Cloud Practitioner Essentials – AWS (Oct 2025)
- Introduction To Technology Apprenticeship Job Simulation – Accenture UK (Jul 2025)
- Introducing Generative AI with AWS – AWS (Jun 2025)
- Probability & Statistics Using Python – Infosys Springboard (May 2025)
- Python Foundation & Basics of Python – Infosys Springboard (May 2025)
- Python for Data Science – Infosys Springboard (Apr 2025)
- Data Science Foundation – Infosys Springboard (Mar 2025)
- Data Science Certification – School of Internet Marketing, Pune (Mar 2025)

ACHIEVEMENTS & AFFILIATIONS

- Rank 1 – App Challenges, IMED
- 3rd Prize – Research Paper Competition, IMED
- 1st Runner Up – TextTalk, IMED
- Top 50 Teams – QRAPTOR Hackathon
- Mentee – Pragati Cohort 4 (Infosys Springboard) & AI EMPOWER HER Program
- Scholar – SheFi

LANGUAGES

- English: Fluent
- Hindi & Marathi: Native
- German: Basic Conversational
